

# Croydon4

17<sup>th</sup> August 2022

Revision A

## WIP stage

**Step 1:** Information required&received

**Step 2:** View angles

**Step 3:** Model & model check

**Step 4:** Pre render

**Step 5:** Final render

**Step 6:** Post Edit

**Step 2 :** - View angle - Please choose from the following view angles the preferred choice. If you mark your preferred crop we can adjust. After this step is agreed it will delay the project if we later on change the angle.

**Step 3 :** - Model - Now we model the detail in 3d, using your plans, sections, elevations or reference photos

**Step 4 :** - Pre render - Now we add the color and some texture to the model to test the finishes and make sure we have the right

**Step 5 :** - Final render - lights ,shadow ,reflections textures. This is where the image begins to look real.

**Step 6 :** - Post Edit - This is where we add a few touches that we might not do in 3d. For example people. We also adjust the tone of the colors and blend the final balance.
